

**CAD/CAM ÇÖZÜMLER İÇİN
BEGO KÜTÜPHANESİNE
NASIL ERİŞİLEBİLİR?**

BEGO Kütüphane Erişimi

• Kullanmış olduğunuz BEGO Semados Implant ailesi, implant abutment bağlantı yapısına göre, aşağıdaki linke tıklayınız:

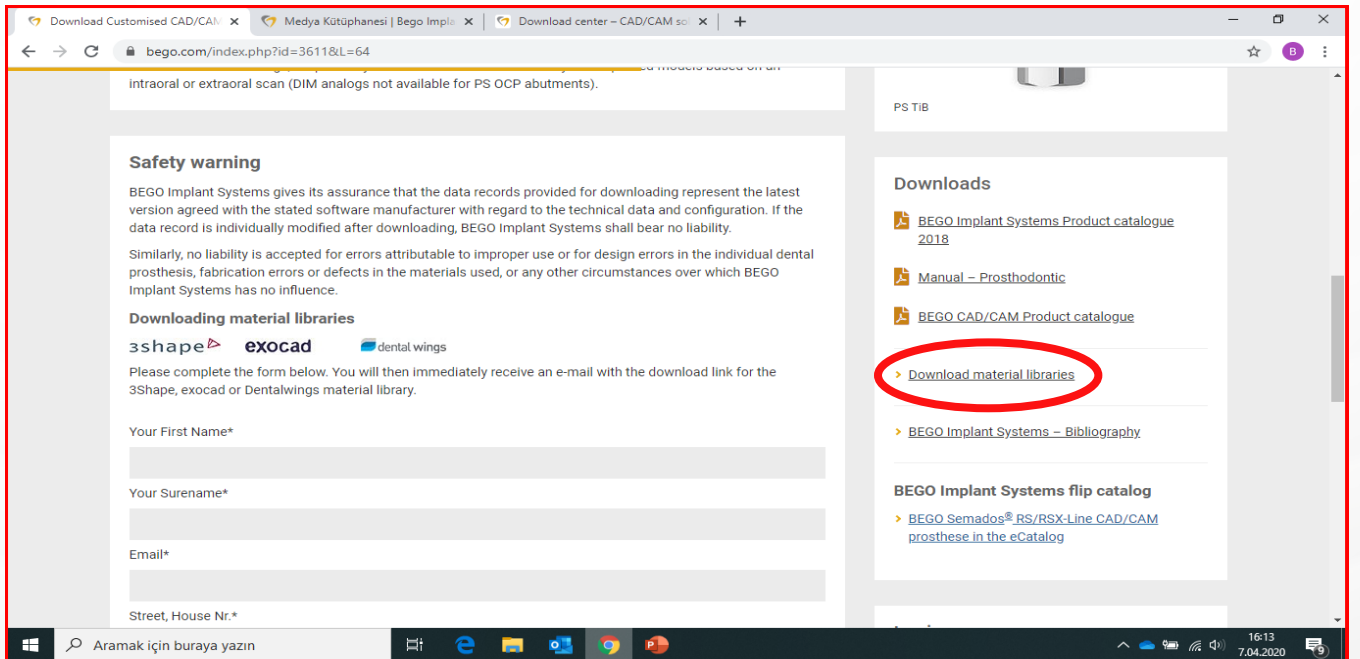

a. Bağlantı Yapısı Platform Switch olanlar:

<https://www.bego.com/implantology-solutions/prosthetic/platform-switch-design/cadcam-prostheses/download-customised-cadcam-implant-prosthetics>

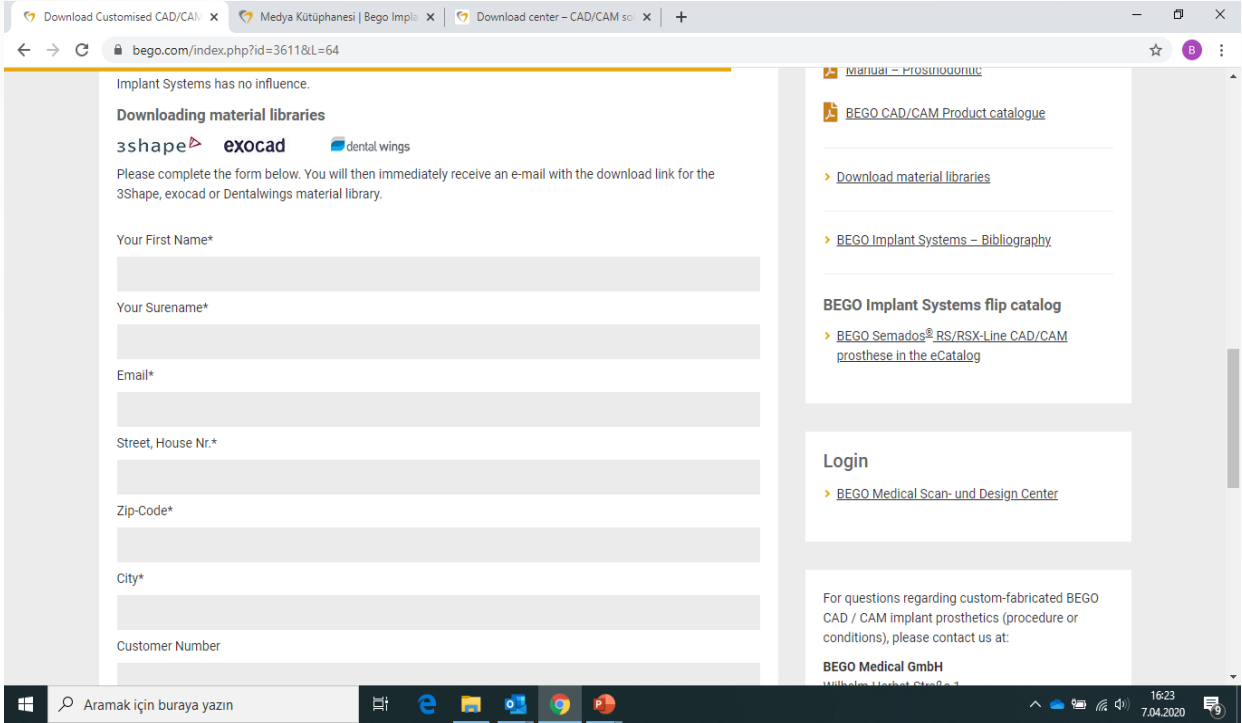

b. Bağlantı Yapısı Platform Match olanlar:

<https://www.bego.com/implantology-solutions/prosthetic/platform-match-design/cadcam-prostheses/download-customised-cadcam-implant-prosthetics/>

Gelen Sayfada: Download Material Libraries’i tıklayınız

Formu doldurarak «request material libraries»e basarak gönderiniz

Implant Systems has no influence.

Downloading material libraries

3shape exocad dental wings

Please complete the form below. You will then immediately receive an e-mail with the download link for the 3Shape, exocad or Dentalwings material library.

Your First Name*

Your Surname*

Email*

Street, House Nr.*

Zip-Code*

City*

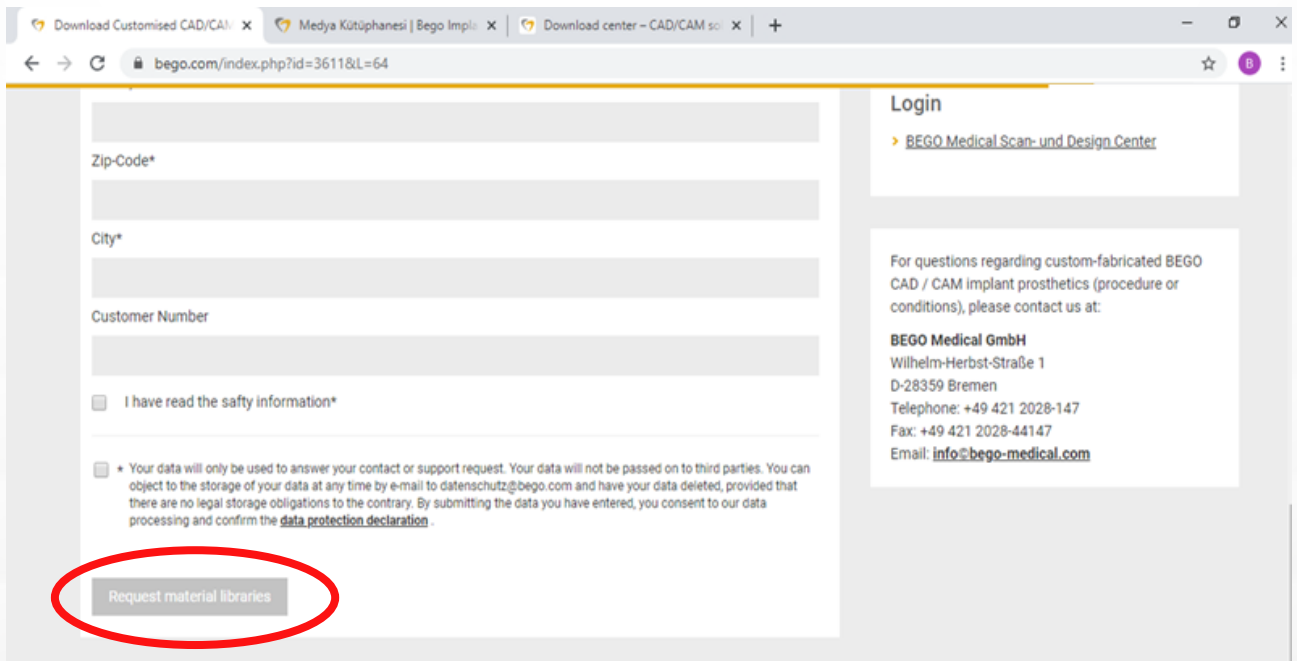

Customer Number

I have read the safty information*

* Your data will only be used to answer your contact or support request. Your data will not be passed on to third parties. You can object to the storage of your data at any time by e-mail to datenschutz@bego.com and have your data deleted, provided that there are no legal storage obligations to the contrary. By submitting the data you have entered, you consent to our data processing and confirm the [data protection declaration](#).

Download material libraries

Many thanks for your enquiry, kübra Demir.

3Shape System

Adhesive Abutment PS TIB

For the 3Shape system, the geometry of the adhesive abutment hex and no hex is available [here](#) in this material data library for designing hybrid abutments with Platform Switch on

BEGO Semados® SC/SCX – RS/R SX – RI implants and a placeholder geometry for Platform Switch DIM analogs as a solution for your 3D printed models based on an intraoral or extraoral scan.

OCP – OneCare Package

For the 3Shape system, the geometry of the OCP hex abutments is available [here](#) in a material data library for designing hybrid abutments with Platform Switch on BEGO Semados® SC/SCX – RS/R SX – RI implants.

MultiPlus

For the 3Shape system, the conical connecting piece of the geometry of the MultiPlus bases is available [here](#) in this material data library for designing the tertiary structures on MultiPlus abutments and a placeholder geometry for Platform Switch DIM analogs as a solution for your 3D printed models based on an intraoral and extraoral scan.

Exocad

Adhesive Abutment PS TIB

For the exocad system, the geometry of the adhesive abutment hex and no hex is available [here](#) in this material data library for designing the hybrid abutments with Platform Switch on BEGO Semados® SC/SCX – RS/R SX – RI implants and placeholder geometries in 4 different fit widths for PS DIM analogs (as of November 2019, exocad does not offer a solution for adjusting the friction for the Platform Switch Design DIM analog) as a solution for your 3D printed models based on an intraoral or extraoral scan.

OCP – OneCarePackage

For the exocad system, the geometry of the OCP hex abutments is available [here](#) in a material data library for designing hybrid abutments with Platform Switch on BEGO Semados® SC/SCX – RS/R SX – RI implants.

MultiPlus

For the exocad system, the conical connecting part of the geometry of the MultiPlus bases is available [here](#) in the material data library for designing tertiary structures on MultiPlus abutments as well as placeholder geometries in 4 different fit widths for PS DIM analogs (as of November 2019, exocad does not offer any solution in the software for adjusting the friction for the Platform Switch Design DIM analog) as a solution for your 3D printed models based on an intraoral or extraoral scan.

Dentalwings

Adhesive Abutment PS TIB

For the Dental Wings system, the geometry of the adhesive abutment hex and no hex is available [here](#) in this material data library for designing hybrid abutments with Platform Switch on

BEGO Semados® SC/SCX – RS/R SX – RI implants and a placeholder geometry for Platform Switch DIM analogs as a solution for your 3D printed models based on an intraoral or extraoral scan.

OCP – OneCarePackage

For the dental wings system, the geometry of the OCP hex abutments is available [here](#) in a material data library for designing hybrid abutments with Platform Switch on

BEGO Semados® SC/SCX – RS/R SX – RI implants.

MultiPlus

For the Dental Wings system, the conical connecting part of the geometry of the MultiPlus bases is available [here](#) in this material data library for designing the tertiary structures on MultiPlus abutments and a placeholder geometry for Platform Switch DIM analogs as a solution for your 3D printed models based on an intraoral and extraoral scan.
